EcoSolutions®

The Green Building / LEED programs was created to provide contractors, building engineers, developers and architects with incentives or rewards for utilizing energy saving and water conservation products in the construction or renovation of their buildings. The LEED program provides points or credits that can be used to offset elements of the construction that would be debits against the property. Using a 1.6 gpf / 6.0 lpf toilets as the baseline, a HET toilet or HEU urinal that has a minimum average water savings of 20% can earn one (1) LEED point, or a minimum water savings of 32% can earn two (2) LEED points.

This fixture qualifies according to ASME test procedures as a high efficiency toilet (HET) with an average consumption of 1.28 gpf / 4.8 lpf or less with a minimum water savings of 20%.
